

Amir Gholizad | Software Developer

St. John's, NL, Canada | +1 709-691-2883 | a.m.gholizad@gmail.com | www.amirg.dev

SUMMARY

Software Developer and AWS Certified Cloud Practitioner who ships production software across full-stack web platforms, AI-integrated products, and engineering optimization tools. Owns features end to end, from scoping requirements with clients and stakeholders to shipping tested and reviewed code. Collaborates in distributed teams through code review and Agile processes, presents technical results to non-technical audiences, and has supported hiring of new developers.

EXPERIENCE

Software Developer (Part-time)

Global Maritime

February 2026 – Present

St. John's, NL, Canada

- Optimized offshore vessel routing in Python with DFS and Branch-and-Bound under fuel and scheduling limits.
- Refactored simulation workflows with lazy generators, cutting runtime and memory use by more than **1000X**.
- Presented routing results to marine operations staff and managers, turning solver output into schedule decisions.
- Standardized contributions to the Azure DevOps repository with pre-commit hooks, a pull request template, and licensing.
- Supported the hiring team in recruiting new software developers, from screening candidates to technical interviews.

Full-Stack Developer (Part-time, Contract)

SenseNet Inc.

April 2026 – August 2026

Remote, Canada

- Built a full-stack AI based content aggregation platform with GPT-Nano, NestJS, TypeORM/PostgreSQL, and React 19.
- Architected a multi-stage async pipeline on Bull and Redis with retries, keeping jobs recoverable under load.
- Managed and developed the entire SDLC through Scrum, from backlog grooming and sprints to code review and release.

Co-Founder & Web Developer

Sharplines Studio

July 2025 – Present

Remote, Canada

- Co-founded a web design studio building sites for local businesses, from first client meeting to launch.
- Scoped and delivered multiple paid client websites, gathering requirements from owners and iterating on feedback.
- Sample work: wheeldealnl.com (Next.js, Tailwind CSS, Vercel) and provolta.ca (Astro, Netlify, 4 languages).

Full-Stack Developer (Internship)

Deepflow Labs

June 2025 – August 2025

Remote, USA

- Built a full-stack social media app with Next.js server components, Postgres, and RadixUI (auth, feed, profiles).
- Extracted shared UI and database packages into a Turborepo monorepo, reused across **3** projects.
- Documented shared components in Storybook and wired CI checks so teammates could adopt them via PRs.

Data Scientist (Research Assistant)

Memorial University of Newfoundland

September 2022 – November 2024

St. John's, NL, Canada

- Built Postgres/SQLAlchemy ETL pipelines over **5M+** rows of financial data, cutting processing time by **80%**.
- Built a statistical model for financial time series using Python and presented findings to the research group.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, HTML, CSS

Frameworks: React.js, Next.js, Node.js (Express.js, Nest.js), FastAPI, Flask, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps: Docker, GitHub Actions, Azure DevOps, CI/CD, AWS, Git, Linux

Testing: Pytest, Jest, Playwright, Storybook

Practices: REST API design, Agile (Scrum, Jira), Code Review

EDUCATION

Diploma in Software Engineering, BrainStation, GPA: 92%

2024 – 2025

(Full-Stack Software Development Bootcamp)

M.Sc. Physics, Memorial University of Newfoundland, St. John's, GPA: 81%

2022 – 2024

AWARDS & CERTIFICATIONS

AWS Certified Cloud Practitioner

2024 – 2027

People's Choice Award (Hackfrost NL & DO IT Hackathon)

2025
