

Amir Gholizad | Software Developer

St. John's, NL, Canada

+1 709-691-2883 | a.m.gholizad@gmail.com | www.amirg.dev

SUMMARY

Software Developer and AWS Certified Cloud Practitioner experienced in designing and deploying RESTful APIs and full-stack applications, with a research background in scientific modeling and Machine Learning. Comfortable owning features end to end and shipping reliable, well-tested software to production.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS

Front-End: React.js, Next.js, Redux, TanStack Query

Back-End: Node.js (Express.js, Nest.js), Python (Flask, FastAPI), Java (Spring Boot)

Databases: PostgreSQL, MySQL, MongoDB, Redis

Testing: Pytest, Jest, Playwright (E2E), Storybook

DevOps & Tools: Docker, GitHub Actions, CI/CD, AWS, Git, Linux (Bash)

Other: OpenAI, Agile (Jira, Scrum)

EXPERIENCE

Software Developer Intern

Global Maritime

February 2026 – Present

St. John's, NL, Canada

- Optimized Offshore Support Vessel routing using Python and DFS and Branch-and-Bound methods.
- Refactored simulation workflows with lazy generators, cutting runtime and memory use by more than **1000X**.
- Modeled vessel scheduling constraints and fuel costs to compare routing plans against baselines.
- Added Pytest regression tests over solver outputs, catching routing errors before simulation runs.

Software Developer

SenseNet Inc. (Part-time, Contract)

April 2026 – August 2026

Remote, Canada

- Developed a full-stack platform using NestJS, TypeORM/PostgreSQL, and React 19.
- Architected a multi-stage async processing pipeline with Bull and Redis, enhancing content automation.
- Designed REST endpoints and TypeORM migrations backing the platform's core content models.
- Added retry and failure handling to queued jobs, keeping the pipeline recoverable under load.

Full-Stack Developer Intern

Deepflow Labs

June 2025 – August 2025

Remote, USA

- Built a full-stack social media app clone with Next.js, Postgres, and RadixUI.
- Extracted shared UI and database packages into a Turborepo monorepo, reused across **3** projects.
- Implemented authentication, feed, and profile flows with Next.js server components.
- Documented shared components in Storybook and wired CI checks across the monorepo.

Data Science Researcher

Memorial University of Newfoundland

September 2022 – November 2024

St. John's, NL, Canada

- Estimated statistical potential functions on financial time-series data with Pandas and Scikit-learn.
- Built Postgres/SQLAlchemy ETL pipelines over 5M+ rows, reducing original processing time by **80%**.
- Validated model fits with cross-validation and bootstrapped confidence intervals.
- Automated reproducible analysis notebooks and Matplotlib reporting for research reviews.

PROJECTS

Wheel Deal Driver Training	2026
Next.js, TypeScript, Tailwind CSS, Vercel	wheeldealnl.com
– Built and shipped a 5-page site for a driving school with the Next.js App Router and Tailwind CSS. – Added an accessible contact form with client-side validation and honeypot spam filtering. – Deployed on Vercel with static prerendering, image and font optimization, and JSON-LD local SEO.	
Provolta Electric	2026
Astro, JavaScript, Netlify	provolta.ca
– Built a static marketing site for an electrical contractor with Astro and scoped component CSS. – Templated 20 service-area and service landing pages, localized across 4 languages. – Wired quote forms with file upload via Netlify Forms, plus geo and hours structured data.	

AWARDS

Autonomous Robot Python, OpenCV, Raspberry Pi	2025
– Built an autonomous robot with real-time image detection and a 3D-printed chassis. – Won the People’s Choice Award at the Hackfrost NL & DO IT Hackathon.	

EDUCATION

BrainStation	Toronto, ON, Canada
Diploma in Software Engineering, GPA: 92%	2024 – 2025
Memorial University of Newfoundland	St. John’s, NL, Canada
M.Sc. Physics, GPA: 81%	2022 – 2024

CERTIFICATIONS

AWS Certified Cloud Practitioner	2024 – 2027
---	-------------
